Net Weight(g)	275g
Numbers of Teeth	12T
Teeth Height	15mm
Blade Diameter	7"(170mm)
Disc Bore Size	7/8"(22.2mm)
Blade Thickness	2.0-2.2mm
MAX.RPM	10000
Cutting Condition	Dry/Wet

Concrete cutting diamond disc,
diamond cut saw blades.

7" (170mm) Sale Triangle Protective
Turbo Blade/Diamond Tool/Diamond Saw
Blade.

This blade with jumbo segments
provides the best cutting performance for
all masonry projects. Use this premium

blade for fast and smooth cuts on concrete, brick, block, stone, and more. Use the blade for dry or wet cutting with high speed hand held saws, masonry table saws and walk behind saws. Our products have been trusted by professionals for many years. We are committed to the development and improvement of tools for professional contractors and do-it-yourselfers alike. We put our trusted name to every product we sell.

Features

- 1) The saw blade has good sharpness and high efficiency at the process of cutting;
- 2) The saw blade can perfect high working performance without chip or breaking slates while cutting.
- 3) Diamond especially particles and coarse particles. Combination ratio formula, blade wear, high sharpness.
- 4) High-quality Diamond Segment Made from High-grade. Diamond by Special and Advanced Technics.

Quality control

We control quality through systematic management to ensure that products or services meet customer needs and achieve the goal of continuous customer satisfaction.

We guarantee that in the right production environment, the right people, the right powder, the right equipment and the right technology to produce qualified products. Make a reasonable production arrangement plan according to the current equipment situation, personnel situation, product reserves, etc., and then prepare the required materials (matrix, powder, mold, etc.) according to the schedule, and arrange to start production.

We provide free samples for you to test the quality, but the shipping costs need to be borne by you.

Packaging & Delivery: Carton or fumigated crate, as your requirements. 1. Rust proofed
2. Water Proofed 3. Impact protection

Delivery time: Shipped in 7 working days after payment.

Percentage of raw materials:

- High quality carbon structural steel matrix,
- 65 manganese steel,
- High grade diamond,
- Intermediate or above quality,
- Homemade alloy powder.

Using machine

Application:

- Stone,
- concrete,
- carving.

Tool Compatibility:

- Stone cutting machine (marble machine),
- Angle grinder (engraving),
- Wall slot machine,
- Hand saw.

Safety and working instructions

- Safety and working instructions for using diamond cutting pieces
- When installing or replacing the cutting piece, unplug the plug from the socket.
- Please choose the appropriate cutting piece according to the material to be processed.
- Cleaning flanges, shafts and cutting pieces.
- The flange shall be at least 1 / 3 of the diameter of the cutting piece
- The diameter of the shaft must be as large as the hole in the cutting piece.
- Do not privately increase the hole in the cutting piece.
- The direction of the arrow on the cutting piece and the steering of the machine must be caused by the direction of the arrow on the cutting piece and the steering of the machine.
- The maximum speed of the machine shall not be higher than the allowable maximum speed of the cutting piece.
- Can only do right angle or straight line cutting, engaging in curved angle cutting may cause section core fracture or section fracture.
- Avoid pressing the machine and hitting the material with the machine. Don't let the cutting piece overheat. Stop working at the right time to cool the cutting piece.
- Please remove the cutting piece when transporting the machine to avoid unnecessary damage.
- Wear protective goggles, industrial gloves, masks, safety shoes and work clothes when working.
- Protective cover, guide plate and vacuum must be used when working
- When doing wet cutting, isolation transformer must be used, and there must be a strong non-grounding socket on the isolation transformer.
